SUPER 4013

RESILIENCE AND SHAPE MEMORY

SUPER 4013 is a great value product with a height of 40mm (1.57inch).

The lawn looks green, and it is soft and comfortable to step on. It is very romantic to lie on it and enjoy the starry sky with your loved one.

Super 4013 is composed of straight wire and curved wire. The straight silk has two shades of green bright green and bamboo green, which are perfectly blended together, like a water town in the south of the Yangtze River after the rain in autumn, gentle and lingering, and the curly silk is composed of fruit green and egg yellow. High simulation effect is the best choice for our garden products.

COOLING 4513

SOFTNESS AND FINESSE

COOLING 4513 has a particularly realistic look with 6 colours. Its height is 45mm (1.77inch)

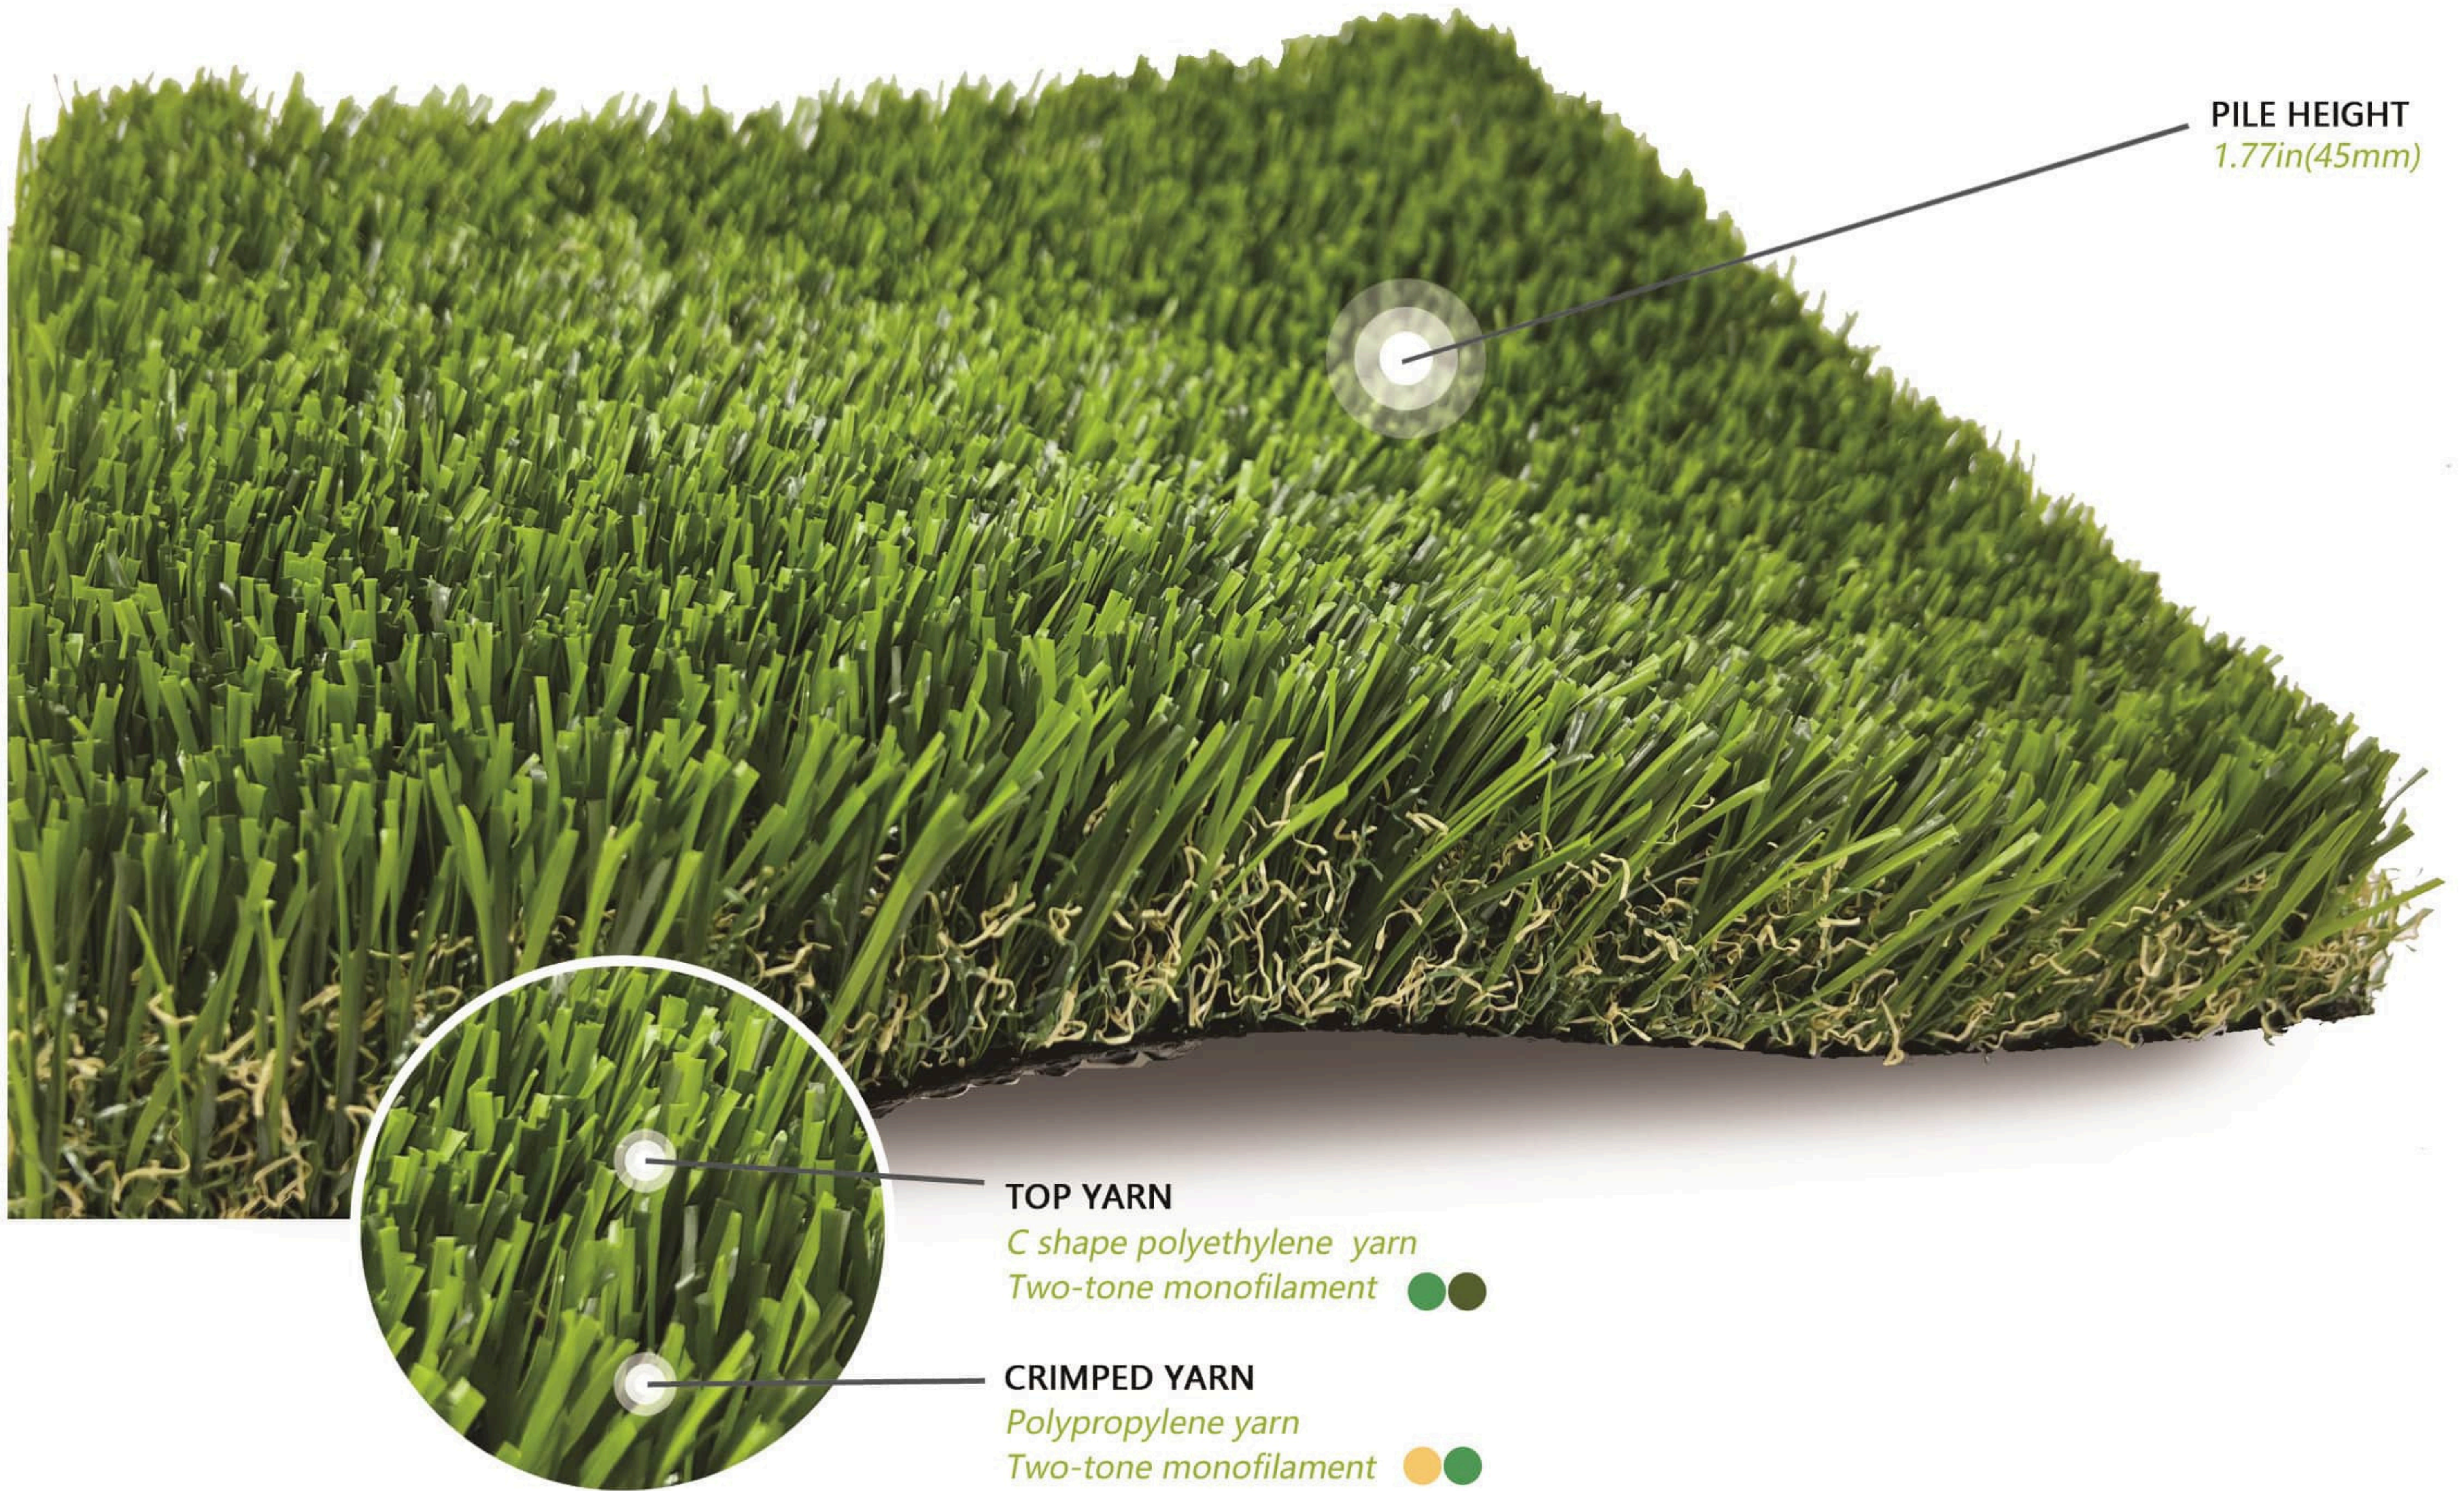

This special lawn is especially suitable for people who have high requirements for quality of life. It's ideal to set off garden and landscape area.

Our R&D team developed cream-coloured straight yarn which use cooling technology for decreasing in heat build up on grass surface. Turf temperatures could be reduced by 6-10°C. This greatly improves artificial turf cooling especially on hot sunny days which is very friendly to the elderly, children and pets.

BLUE SKY 4513

RESILIENCE AND FINESSE

As our new product, this hollow grass is very distinctive and innovative, its pile height is 45 mm (1.77 inch).

The characteristic of this grass yarn is its cross-section. We can see that the middle of the grass yarn is hollow by a magnifying glass. It will increase the cooling effect when be used outdoor. Its small holes can store dew and rainwater. The yarn performance of anti-UV is very good, which is highly suitable for using in hot weather.

It is surface consists of straight and curly yarn. The straight yarn has two tones of green: pine green and apple green, which are perfectly blended, and the neat cross-section makes foot feeling more comfortable. The curly yarn is composed of pine green and light yellow. Customers in hot and strong sunshine regions will love this special shaped lawn.

DIAMOND 4014

RESILIENCE AND SHAPE MEMORY

We are most proud of this white base permeable lawn, which measures 40mm (1.57inch) in height.

The bottom of this lawn is our patented product, the water permeability effect is the best in the market, and It's very popular in the pet product market. Unlike other manufacturers' products, we don't need to add drainage holes separately. The back glue technology can cover the grass lightly and evenly seep water. We are very proud that it can be recognized by more and more people as our exclusive technology.

It's surface consists of straight and bent wires. The straight silk has two shades of green: pine green and olive green, which blend perfectly, and the grass shape of the diamond also makes him more resilient. The curly silk is composed of fruit green and light yellow. This lawn will be the most perfect product you have ever seen.
